Objective

An ambitious, determined and detail-oriented individual with strong technical experience motivated to learn new technologies to further enhance my knowledge.

Experience

PointClickCare / Intermediate Java Developer

July 2015 - Current, 3500 American Blvd W, Bloomington, MN 55431

Intermediate Java Developer (2018 - Current)

Java Developer (July 2015 - 2017)

PointClickCare is a leading company to develop a product, specifically catering to Home and Community Based Services. With the knowledge, experience, and training I have had with a company, I am able to devote my technical expertise with business needs to develop a product that is useful and scalable. As a developer in PointClickCare, my responsibilities were, but not limited to

- Collaborate with a cross functional team of a developer, quality analyst, architect and product owner through frequent code reviews, pair programming, and planning exercises.
- Design and development in all tiers of a web application, including front end, back end and database design.
- Take ownership of have opinions about and drive the development of features.
- Strongly contribute to fixing bugs reported by the customer.
- Involve in maintaining in-house coding standards.

Some of my experience while working in a team at PointClickCare include

- Add functionality to create recurring appointment.
- Add feature to verify eligibility of patient plan.
- Add exception handling mechanism for batch jobs.
- Add OASIS Scrubber provider.
- Fix defects.

Smart Data Solutions / Java Developer (Intern)

April 2015 - June 2015, Kupondole, Lalitpur, Nepal

Smart Data Solutions (SDS) is the United States based corporation who specialize in providing health care payers and networks with front-end medical claims processing services and EDI solutions. While working at Smart Data Solution, my responsibilities were, but not limited to

- Develop the structure for implementing Selenium automation.
- Create an automation test suite for testing different functionality of the system.
- Fix production and application defects.
- Collaborate with other developer and participate in meetings.
- Take accountability for codes written.

Education

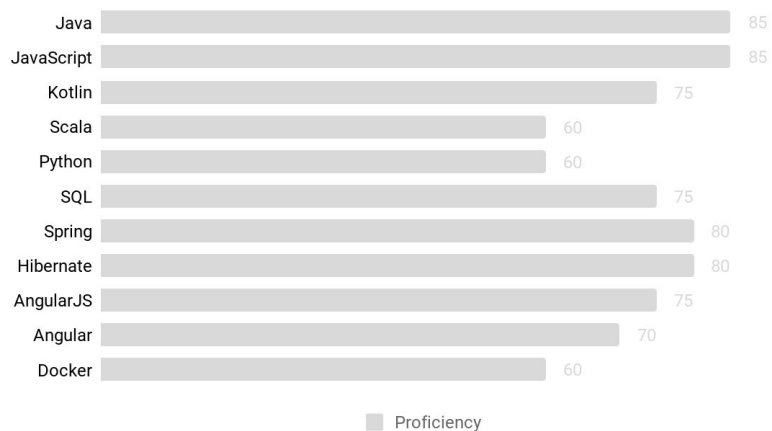

National College of Computer Studies / Bachelors in Information Management

2011 - 2015, Paknajol, Kathmandu

NCCS Higher Secondary School / Intermediate Level

2009 - 2011, Paknajol, Kathmandu
